(54) OPTICAL DISK, REPRODUCTION APPARATUS, AND REPRODUCTION METHOD

(57) Abstract:

An optical disk includes: a data region; and a management region. The data region stores: at least one video object containing video information and audio information; and at least one audio object containing audio information. The management region stores first path information and second path information, the first path information indicating a first reproduction path including only the at least one video object, and the second path information indicating a second reproduction path including a combination of the at least one video object and the at least one audio object.
